About Me

Hello World, I am Rohan Poudel. I am highly optimistic and love learning new things, which sparks an interest in me. I am currently enrolled at The British College, pursuing my Bachelors in BSc (Hons) Computing. The year for my graduation is Sep 2023.

Experience

As a fresher, I only have experience working with a Team for college assessments. I want to devote part of my time to learning, exploring and researching new technologies and meeting like-minded people to share ideas, which would help me expand my scope of understanding. I have added some of the projects that I've built to my website: <https://rohanpoudel.netlify.app>
